Decline to Continue

You will be prompted to set up MFA when you log in the first time. Choose at least one of the three options for verification: Google Authenticator, OKTA Verify, or using a text or phone number.

Tips:

- If you use Google Authenticator or OKTA Verify, download the app before scanning the QR code.
- Authenticator apps work over Wi-Fi.
- You can select to use a phone number to verify. If it is a landline, you can select to receive the code as a voice call.
- Only one form of MFA is required. Once you set one up, the text on the Set-Up Security Methods page reads "Set up later". This does not mean the set up was unsuccessful. You can click "Set up later" to progress into MyVSAC.

*Each time you log into MyVSAC, you will be prompted to verify yourself using the MFA option you selected.

And You're In!
